Bull Sale

S Diamond Angus

7 miles south of the Henderson I-80 exit #342 on the east side,
just north of the Road 2 and Road B intersection.

Sale Day Phones:

Kim: 402/366-8664 Kendall 308/850-5157

Please leave your trailers at home, we will deliver bulls in early April or at a time when it is convenient for you. We like to personally get to know our customers operations to better help understand their genetic needs.

Terms, Conditions and Guarantee: Settle on sale day or within a reasonable time frame ahead of delivery. This has to be approved by S Diamond. All bulls will be sold in their entirety unless otherwise noted in the catalog.

Fertility: All bulls will have a BSE exam done either ahead of the sale or ahead of delivery. Bulls will be guaranteed for the first breeding season, either with a replacement bull or credit on next years sale, minus the salvage value if any.

Herd Health: All bulls will be fully vaccinated ahead of delivery with Pyramid 5, Vib Shield, Alpha 7, Endovac, Multi Min and Ivermectin.

Performance Information: The bull ration is 20% corn, 25% WDG, 5% ground roughage and the balance is sudan grass silage. This years ground roughage was 1/3 rye, 1/3 milo stover and 1/3 soybean stover.

DV Auction: Videos and the catalog will be on our website at www.sdiamondangus.com and on www.DVAuction.com. You can bid real time with live audio/video. DVAuction also offers proxy bidding. You will need high speed internet and need to register more than 24 hours in advance.

Sale Day Information: Individual performance boxes highlighted are the top 5 in each breed group, Angus and Red Angus. Highlighted actual numbers would be the top individual in that breed group. EPD's that are highlighted will be the top 30% of the breed.

Lunch will be served starting at 11:00 am.
The Sale starts at 2:00 pm CST

Galvatron was the lead bull in our Denver pen of 3. We are keeping a semen interest in him as he is really well balanced for growth and carcass. We lost his sire, Optimus, during his first breeding season. Galvatron is how we will continue that line. Read the data and you will understand why his is an important breeding piece moving forward.

It is interesting that one of the biggest framed Optimus calf comes from one of my shorter cows. These Monumental daughters are really stepping up and doing well in a more moderate mature size. Optimize and Optimum are ¾ brothers whose grand dams are mother and daughter. Probably makes them 7/8 full brothers.

ACTUAL	92	609	1005		3.66	10.9	.21	1.10

Thunder is a bigger framed bull out of a cow that, at the age of 12, moved up and had another bull calf for next year. Longevity is a key to profitability. Things like that are still important here at S Diamond. Red Barons granddam was 10 when she had his mom.

I was shocked when Sam told me that Emerald was a new reference sire. We have used him for about 3 years. I guess we only had heifer calves till 2024. He was brought in as a heifer bull for added depth of body and fleshing ability. Another top 5 REA/100 bull that could be used on heifers.

Brody has the top weaning weight offered today and is really consistent, with above average numbers everywhere else. I am not at all worried about his birth weight, as for all 5 generations back are actually bulls we have used on heifers. Remember, pounds is what you get paid for.

**Base Price: \$4,000****Dominion Brody 489**

Average Angus EPD's BW +1.3 WW +67 YW +117 MILK +26 MARB +.75 REA +.69 FAT+.019

“Back in 1979 when I started my own herd, I knew what I wanted. Having shown nearly every breed during my 4-H and FFA career. The bottom line was if you start with a good black cow. Good cattle in any of those breeds would probably work. Having grown up with a feedlot mentality and being around close out sheets and carcass data. My goal was to create cattle that performed well at nearly every level. Dad always told me that at some time in every calf’s life there would be an opportunity to make a profit. Your job was to figure out when that was.

My plan was to start with registered Angus cows. Use AI to use some of the best bulls available. Primarily to raise my own replacements and then use bulls from the continental breeds to create cattle that would excel at the feedlot and the packer.

I had some success at that, but also realized my purebred steers could also come close to my crossbreds. So, I ramped up my efforts in AI to produce more pounds and be able to keep the heifers in production. Keeping all traits in balance was important but not always easy. It also made it hard to try to merchandise bulls that were not extreme in any 1 or 2 traits.

In 1989 we had a red heifer calf born from black parents. Suddenly we were in 2 different breeds with different goals. But my goals had not changed. Even today our motto has not changed. In pursuit of excellence where the only extreme we pursue is extremely well balanced. I like cattle that perform in every facet of the beef industry. Cow/calf, feedlot, packer, and have eye appeal that includes structural soundness, from the ground up. All cattlemen like looking at their cattle and I am no different.

So come and see what 45 years of AI with cows that were developed in our own environment. Not importing embryos from other herds but building them up one generation at a time. Making each one earn their own way. This is what a breeder should be doing. Not just replicating what others have done. Come and see what that looks like.”

Pursuit of Excellence

Here at S Diamond Angus there is an incredible amount of time and effort put in behind the scenes to ensure that we are delivering our customers the best genetics along with the most functional cattle we can possibly produce. A big step was taken 3 years ago to ensure and prove that we were delivering the most competitive genetics in the country and that was to take some bulls to the Denver Stock Show and compete with some of the top producers in the nation. In doing so we have been able to see where we stack up against other breeders and the great news to us is that we are delivering pen of three bulls that have the pounds to run with the best of the best. The comments we receive from the judges is always the same in that we have rugged, structurally sound, athletic high performance bulls that should serve commercial customers extremely well. This is certainly our goal and it has been well worth the extra time and effort just to know and ensure our customers as well as potential customers that they are buying the best producing genetics on the market. Keep in mind that when we bring pens of three we are picking from 15 to 20 bulls of each color and going against breeders who are picking from 50 to 200 bulls due to the size of their calf crop.

We also like to make sure that our genetics are performing at the highest level in the real world as well and over the course of 5 years we participated in a local steer test and were going up against top pens of commercial cross bred steers. We would bring all of our steers and have multiple pens and would have the top earning pen every year. We even had a year where we had the top gaining steer, top earning steer, and top gaining and earning pen. Many years we would have 5 of the top 10 earning pens and we were not bringing our top steers this would have been the bottom third of our male calf crop cause the top two thirds are kept as bulls to have on our sale for our customers. The point of talking about all of this is to let anyone who has bought from us or who is thinking of buying from us that we are in constant pursuit of excellence on their behalf to make sure that what we are selling gives their cattle operation the greatest opportunity to succeed out in the real world and that the genetics bought here are designed to serve you at the highest level possible.

The people behind the sceans.

Kim and Lindy Siebert - the begining of it all. This is where it started and still keep it running.

Justin, Samantha, Riley and Kayde Haack - They live outside of Clatonia. Samantha is in charge of putting the catalog together and making sure cattle are ready for shows. Riley comes to help as often as he can even though he is in college at Iowa Western for Airframe Maintenance. Kayde will help with anything as long as it drives, our roads would be in better shape if he lived closer. Justin is in charge of making sure things are running so Samantha can go to shows, he is also the meat expert.

Kendall, Meghan, Easton and Flynn Siebert - Reside in Henderson. Kendall moved back 2011 to help with the family operation. He is very involved in the farming operation moving the family farm along for the next generation. Easton is in 5th grade and plays multiple sports. Along with 4-H and any cattle show her Aunt Sam can take her too. Flynn is in 1st grade and you will find him with either a sale catalog in his hand or some kind of cattle related object. He is always ready to just be on the farm.

Summit was our middle bull in our Denver pen that stood 3rd to the Grand and Reserve. How many first calf heifers can produce like this. Top gain, frame, and REA with a rump like this is hard to find. Anywhere!! Easy to understand why we are keeping a semen interest.

Perhaps Red Barons heir? Ghost Rider has the top marbling and nearly everything else in the top 5. Yes, we are keeping a semen interest in him. The anchor of our Denver pen. Is it possible to have all this and be easy fleshing? Yes, yes, it is. His dam and her sister are without a doubt the easiest fleshing cows we own.

Base Price: \$5,500

Broadway a full brother to a bull we took to Denver last year, with a top 5 weaning weight. Being an April calf he struggled against the older bulls. He is probably the bull that is changing most rapidly as he is just hitting his stride. The genetics are there for him to be special.

We bought Dark Mission back at weaning time from a customer that bought a group of females from us. He was our alternate to Denver. Top 5 ADG and WDA. Another nice bull from a first calf heifer. When we put females up for sale, we always say they are bred like we planned on keeping them. This proves it!!

This is a very powerful Fall bull sired by KJHT Power Take Off. He had a very successful year in the show ring winning the Nebraska Junior Beef Expo Red Angus Bull, Nebraska State Fair (NSF) Open Class Reserve Champion Red Angus Bull, and NSF FFA Red Angus Bull Champion. This bull has a very elegant front end and is good on his feet. He has a very wide topline and is a very wide pinned deep bull.

Here at S Diamond Angus, we know that calving ease is very important to our commercial customers. We appreciate that lower birthweights usually mean calving ease, which is true. Two years ago, when we had temperatures that were well below freezing for 10 days straight, the size of the calf basically determined if it was going to live or not. The calves that had birthweights lower than 80, were much harder to keep alive than the calves that were above that. Calf vigor is just as important as calving ease in the success of a calf. So when choosing bulls with low birthweights, to prevent calving proplems, consider the fact that smaller calves also do not handle weather changes as well either. We used to think that birthweights in the 70's, were better than the 80's and definitely better than the 90's. But we have found that calves that are in the 80's to 90's, have a better chance of survival after birth. There are many factors that can play into calving ease more than just birthweight. As you are looking through our catalog, if we suggest a bull that has a higher birthweight for heifers, please ask us why we feel safe stating that. It can be based on cow data, calf length and shoulder smoothness.

Bolded numbers are suitable for heifers

Some things you should know about these cattle:

- 1) These bulls were fed on a ration that never exceeded two pounds of corn per 100 pounds of body weight per day, per bull plus sudangrass silage. We feel that it is more important to grow bulls that will go out and breed cows and return home looking like they should. Feeding them at the house in bigger pens and corn stalks with more exercise, did drop our gains, but we believe will make for better bulls for you. Fat bulls are pretty when you buy them, but never again.
- 2) The carcass data on these bulls is presented as close to reality as possible. Please use the marbling scores only for in-herd comparisons. Since 1985 we have collected carcass data on every steer we have raised. We have even gone out and bought calves from our own bulls and fed them out. Our 5 year average of 94% choice or prime, speaks for itself and includes every calf not kept as a bull or replacement female.
- 3) Our goals are to produce bulls that will sire females that will make excellent replacements, and steers with enough performance to weigh 1200-1400 pounds at 12-14 months.
- 4) In the past, our cowherd has shown enough fertility that our calf crop is 80%-90% A.I. sired. This fall, we were at 89.8% pregnant and so far we are at 69% of our calves being born within 21 days of our first due date. Fertility is the number one ingredient in profitability in a cow/calf program. I think this shows in the scrotal circumferences of these bulls and will show in their daughters.
- 5) This cowherd is not a pampered cowherd. We expect these cows to calve unassisted, get the calf up, and raise it on grazed forages as much as possible. Very few calves are born in the barn and of those fewer are assisted in anyway. That is the cow's job.
- 6) **We will keep the bulls until the first to middle of April at no cost to you. We will deliver the bulls to you at that time. All bulls will be semen checked and ready to work. If any bull has a problem in the first year, we will replace him or refund your money.**

How the sale works

Each bull will have a price set before the sale. They will range from \$4000 to \$6000.

During the open house time of 11:30 till 2:00 feel free to examine the bulls and eat dinner. During that time get a buyers number and let the girls know which bulls you are interested in. You may check the master list at any time during the open house. At 2:00 we will announce that we are ready for the auction, at that time you need to finalize your selections. We will start with the highest priced bulls. If more than one buyer is interested in a bull, we will have an auction in \$50-\$100 dollar increments, till the bull is sold. After a bull sells, we will ask the new owner if he is done buying, if so, I will remove his buyer number from any other bulls he had selected. If you are the only one on a bull, you will have the option of taking that bull or passing. You will not go home with more bulls than you need. The auction usually takes 45 minutes to an hour.

If you have any questions, please take time to ask,
that's why we have the open house portion of the sale.
