Good Maxed Out son from a very strong cow family. This cow has had twins before so I was happy to see what she could do raising just one. Nice bull with moderate birth weight and nice performance.

Here is this years power bull and comes as no surprise to me as she came close last year with a full brother. Big, deep and the top IMF bull and one of the leanest. If you sell on the grid, this is your style of bull. He even has a moderate birth weight.

Used our black Bismarck son at Sam's to follow up on the 4-H herd after AI. That's how we got this calf. We don't do a lot of the black-red carrier thing but he was too good to cut. Above group average for both carcass traits with a modest BW.

Unintentional line breeding happens when some cows don't settle AI. And sometimes it works out well. This is one of those times. Kind of hit a home run on REA and REA/100 with the leanest bull available today. Grid feeders here he is.

We bought back Crosscurrent because of his top quality mother, great hip shape, massive testicles and great base width. Not confident enough to call him a heifer bull in spite of his birth weight and EPD. Enjoy him for a moderate BW growth bull.

## **Some things you should know about these cattle:**

- 1) These bulls were fed on a ration that never exceeded two pounds of corn per 100 pounds of body weight per day per bull plus corn silage. We feel that it is more important to grow bulls that will go out and breed cows and return home looking like they should. Feeding them at the house in bigger pens and more exercise did drop our gains but we believe will make for better bulls for you. Fat bulls are pretty when you buy them but never again.
- 2) The carcass data on these bulls is presented as close to reality as possible. Please use the marbling scores only for in-herd comparisons. Since 1985 we have collected carcass data on every steer we have raised. We have even gone out and bought calves from our own bulls and fed them out. Our 5 year average of **94%** choice or prime speaks for itself and includes every calf not kept as a bull or replacement female.
- 3) Our goals are to produce bulls that will sire females that will make excellent replacements and steers with enough performance to weigh 1200-1400 pounds at 12-14 months.
- 4) In the past our cowherd has shown enough fertility that our calf crop is 80%-90% A.I. sired. This fall we were at 92.3% pregnant and so far we are at **52%** of our calves were born within **21** days of our first due date. Fertility is the number one ingredient in profitability in a cow/calf program. I think this shows in the scrotal circumferences of these bulls and will show in their daughters.
- 5) This cowherd is not a pampered cowherd. We expect these cows to calve unassisted, get the calf up, and raise it on grazed forages as much as possible. Very few calves are born in the barn and of those fewer are assisted in anyway. That is the cow's job.

**6) We will keep the bulls until the first to middle of April at no cost to you. We will deliver the bulls to you at that time. All bulls will be semen checked and ready to work. If any bull has a problem in the first year we will replace him or refund your money.**

### **HOW THE SALE WORKS:**

Each bull will have a price before the sale. They will range from \$2500 to \$3500. During the open house of 11:30 till 2:00 feel free to examine the bulls and eat lunch. During that time get a buyers number and let the girls know which bulls you would like to bid on. The list is open to inspection at any time. At 2:00 we will announce that the auction is about to start and make your final selections. We will start with the higher priced bulls, if more than one buyer is interested, we will have an auction between the interested buyers. After a bull sells the new owner will be asked if he is done. If so we will remove his number from the other bulls. If you are alone on a bull you have the right to hold him till the end of the auction or pass. You will not go home with more bulls than you need.

# **Thank You,**

for attending our sale.

We hope by attending, you will take something home with you that will help you meet your goals for the future.

Whether it be a bull, or just some information that you picked up here, either from us, or another customer.
